Professional Summary

I am a motivated B.Tech student specializing in Artificial Intelligence and Data Science, with a strong foundation in data analysis, machine learning, and model development. As a beginner in the field, I am passionate about exploring the intersections of AI and real-world applications, particularly in aerospace engineering. My academic journey has equipped me with the skills to approach complex problems with analytical rigor and a commitment to continuous learning. I am eager to apply my knowledge and contribute to innovative projects that leverage AI to solve challenging problems.

Education

- **Bachelor of Technology (AI&DS) | Anna University**

  2022-2026 | Pursuing

- **SSLC & HSC | STATE BOARD** (Tamilnadu)

  2014-2021 | Completed

Languages

- Tamil:Fluent
- English:Intermediate

Skills & Abilities

Machine Learning & AI: Proficient in developing and implementing machine learning models, including supervised and unsupervised learning techniques. Familiar with concepts such as hypothesis spaces, generalization, and bias-variance trade-off.

Data Analysis & Visualization: Skilled in data preprocessing, analysis, and visualization using tools like Python (Pandas, NumPy, Matplotlib) and SQL. Capable of deriving actionable insights from complex datasets.

Programming: Strong programming skills in Python, with experience in using libraries like TensorFlow, Scikit-learn, and Keras for machine learning and deep learning applications.

Mathematical & Statistical Proficiency: Solid foundation in linear algebra, probability, statistics, and their applications in machine learning and data science.

Software Development: Familiar with using Visual Studio Code for developing and debugging software projects. Experience in collaborative software development and version control using Git.

Continuous Learning & Adaptability: Committed to staying updated with the latest developments in AI and data science. Eager to learn and adapt to new technologies and methodology.

Portfolio
